Now and then we find mention of a shop grossing over $5000 a year, but this is exceptional and means that the proprietor has to extend a great deal of credit to take in that amount. Mention could be made here of the yardgoods shops which have come into existence because of the women's desire for the factory-made cotton goods, often of inferior quality. Often they sell beautiful handmade woolen fabrics at ridiculously low prices just to buy the cotton goods which they take to a local dressmaker in order to have a frock in the modern style.

The artisans ply their crafts in small shops, often in full view of those passing on the street. By working near the door or window they take advantage of the daylight and thus use less electricity in their dim ateliers. The list of these artisans for a village in Central Greece reveals much about them and about the Greek village itself:

Two saddlemakers — who are also part-time farmers.

Two blacksmiths — both well-trained skilled laborers owning their own shops.

Two shoemakers — one only repairs shoes, while the other also makes new shoes.

Three tailors — one is exceptionally good, but the others are considered poor in their work.

Four butchers — all have out-of-door shops and kill animals only as needed. Usually one or two sheep are butchered each week. The owners cook the intestines which they sell very readily.

Ten seamstresses — some farm in addition.

Three barbers — one popular, the other two fair. All are located in the coffeehouses.

One horseshoe maker — owns twenty-five stremmas of land, which he farms. (One stremma is one fourth of an acre.)

Four masons — one owns eight stremmas of land which he farms, while the rest own no land. Two of these men are in the small village musical group which plays at all weddings and festivals.

Five cart owners — who earn a living by transporting products.

This random presentation of the services found in eight Greek villages scattered over Central and Northern Greece provides a quick introduction to, rather than any conclusive statement about, the business activity going on around the village square.

Telephone and electric poles indicate whether these two utilities are available locally. There is usually only one telephone, either in the office of the gendarmerie, the local community council, or a centrally located café. Should the village be one of those favored with electricity, the peasants proudly inform the visitor of that fact. When we asked what the advantages of electricity are, we got various replies: "Electricity brings cleanliness. We used to have smelly kerosene lamps." "Now we can light the streets and see where we walk in the evening." "We can have radios and learn what

Saturday; in other villages it may be on Thursday evening or Friday. Now and then one may come upon a group of women making use of a neighborhood oven where combined efforts mean greater economy of fuel. More and more, village bakers are relieving housewives of the baking chores, although the women must prepare the loaves and other food for the oven. Throughout rural Greece the bread is usually dark, since only about 2.5 percent of the bran is extracted.

It is hard to think of Greek food, however, without thinking of the resinated wine that is served to guests with the meal. Foreign travelers never fail to react quite strongly to the taste and properties of this unusual drink. Z. D. Ferriman in his *Home Life in Hellas* (1910) describes it as

> a beverage whose odour has been compared to various things — furniture polish and melted sealing-wax among others. A high dignitary of the Church from Constantinople said of it many centuries ago, that it resembled the juice of the pine tree rather than that of the grape, an observation that is strictly true. To the novice it is extremely nauseous, and some people never acquire the taste. To the Greek it is nectar. He lauds its flavour of turpentine on account of its alleged peptic qualities.[1]

On holidays and special occasions the men, as already noted, may drink ouzo.

In addition to her preoccupation with food, although it is served simply and in limited variety, the housewife also has to spend much time preparing clothes for her family. This holds true even though the villagers throughout Greece no longer wear the highly embroidered costumes of two or three generations ago and have adopted the Western style of dress. Some villages, such as Megara near Athens, with an eye on the tourist dollar, are exceptions to this rule, for their streets become resplendent on Sundays and holidays as some of the residents stroll in traditional dress. There are, however, little touches of costume which vary from one region to another. The nomadic peoples, described earlier, can always be identified by their black garb; the Turkish men of Thrace by their baggy trousers and fezzes and their women by veils and ballooning Turkish trousers.

But the Greek peasant styles are becoming more uniform. In the northern Peloponnesos the women wear as a standard work garment a skirt and a blouse, along with heelless pigskin moccasins, pointed at the toe. In many other parts of Greece a chemise, with or without sleeves, is common. These garments and their underwear are woven and sewn at home; the "woolies" which are worn in cold weather are knitted by the women. On Sunday the women wear a "best" dress, which they may have bought in town or at least modeled on a dress someone else obtained there. Underneath is the customary slip. Regular Western shoes with heels are a part of the dress-up outfit. When the women are working outside they wear headscarfs, with the

1:Sanders Z-5/t (1952-1959) 1962 EH1 Greece EH1

291 [765] older women wearing dark brown and the girls white. Black scarfs are for mourning only.

[292] [294] In the Peloponnesos the men buy their trousers and coats but wear home-made underwear and shirts. They have a good suit for Sunday which, when it becomes threadbare, they wear every day. The socks are woolen and are made at home. Sandals are often worn in the fields while regular shoes are reserved for occasions when the men dress up in their best. The cap is such [609] a favorite headgear in the Peloponnesos that if a villager sees a man with a hat he will assume that he is an outsider. The children dress like the adults, although the boys wear short trousers.

283 [461] [527] [286] Behind the garments lie many long patient hours of painstaking work. The women make their own woolen thread but buy the cotton thread. They spin when otherwise unoccupied, for they feel that they must be busy with some handiwork except on Sunday, a day on which they do not even touch a needle or spindle. In many villages one still finds that practically every house has its own loom, stored during the summer but busy in the winter as each woman tries to supply her family's needs and as the unmarried girls work on their dowries. These looms eat up so much thread that spinning never seems to be completed.

438 286 [437] Younger women, seeking some release from this onerous task of making so much cloth at home, use their meager funds for the purchase of store-bought goods. They even exchange with the town merchants some of the priceless costumes, which have been handed down through many years, for factory-made cloth that gives them a more fashionable feel.

286 517 In the Pelion district around Volos the only examples of popular art being produced today are the blankets and household linen which the women continue to make on their crude looms. According to Kitsos A. Makres, who has written extensively on this subject,[8] they continue this weaving because of a romantic, unconscious desire to give the same decorative color to the house that they have known all of their lives. He points out that buying the industrial materials is more economical but that the aesthetic urge keeps the women's handicrafts alive.

286 184 [438] The most detailed study of national costumes and the art of weaving and embroidering in Greece has been made by Angelike Chatzemichale.[9] She and others associated with her have tried to stimulate the increase in such handicrafts, for which there is a ready sale in Greece and abroad. She finds that the main variations in materials used are between the mainland and the islands. On the mainland the goods are handwoven from wool to stand hard wear, an exception being in Epirus where cotton and linen materials are made for household use. In the cities, such as Salonica and Volos, silk has long been popular. On the islands, however, few woolen materials are used since the preference is for cotton, silk, and felt.[10] The villages of the mainland, particularly in the mountains, have had to be much more self-sufficient

of Macedonia the bride's brother is supposed to help with the dressing. Proximity to the city changes many of the traditional patterns. The bride, for instance, may have her bridal dress made by a dressmaker and the dressmaker may be present at the time the bride dresses to be sure that the veil is in proper place. Also, the bride may have gone to a beauty parlor to get a permanent wave. The frizzier her hair, the more beautiful she is thought to be. If she cannot get to a beauty parlor, her friends will put her hair into curlers or will wet her hair and make waves. The bride's hair is combed before she puts on her dress, and it is quite a trick to get the dress on without mussing the hair. The wise woman or dressmaker will help her with her makeup: rouge, lipstick, much powder. The veil is pinned with two little bunches of orange blossoms and, of course, the richer the bride, the fuller the gown and the longer the veil. White gloves are becoming more common, as is a small bouquet. The bride's best friend must give her something old (perhaps a garter) to wear and the wise woman busies herself doing knots of various kinds to control the fates in behalf of the bride.

The duties of the koumbaros vary from place to place. If there are two sponsors (normally, a married couple), the koumbara, or woman sponsor, may be expected to buy two big white candles, quite expensive, and enough silk material for the dress of the bride and for tying the candles with a bouquet of orange blossoms. One of the diversions in the ceremony in the church is to watch the two small children holding these heavy candles and to notice how frequently their inattention seems on the point of starting a general conflagration.

There is also a ritual connected with the dance held at the bride's house after the ceremony at the church. One of the fathers of the young couple will throw some money into the musician's box so that he can lead the dance in honor of the bride and can choose any dance that he likes. This dance may last from six to ten minutes. Then the bride's nearest male relative will pay the musicians and lead a dance in honor of the groom first and then the bride. Then it is the turn of the koumbaros. This continues until each one who wants to honor the couple will do the same; after this, the dance turns into an ordinary one, and anybody who wants to lead can do so by paying the musicians, thereby gaining the right to name the dance and therefore the music that is to be played.

There are wide variations, also, in the greeting given by the mother-in-law to the bride when she first arrives. Sometimes, the mother-in-law puts a dish in front of the daughter-in-law who breaks it; sometimes she gives an ax which the bride is to use in showing all present how well she can chop wood. Then, too, instead of taking up the small boy, as the bride does in Artotina, the boy may come and sit on her knee and receive a round piece of bread for supposedly bringing her good luck. In Kilkis, Macedonia, the brother of the bride has a big round pie which he breaks on her head upon

Vasilika

the members of several farm households get supplementary income from various sources besides wage labor. Bee-keeping, for example, is becoming an increasingly popular supplementary activity. Three households have as many as a dozen hives and sell the honey. A few households raise pigeons as an extra source of food, and now and then one or two may join together to raise a pig. One farmer's son has what might be called the "fish concession" in Vasilika. He contracts to buy the fresh fish from an itinerant vendor and then sells the fish in Vasilika at a tiny profit.

The proprietorship of the coffeehouses in Vasilika enables two of Vasilika's households substantially to supplement the income which they derive from their agricultural holdings.

Two young, still unmarried girls have had training as dressmakers. One of the girls, who learned her skill in Athens, spends all her time sewing and rarely contributes to fieldwork on the farm. The second girl, who had her apprenticeship in Levadhia, works on clothes for her customers in intervals between all her field and household chores. Every woman in the village can do some sewing and several have foot-driven machines, but the two seamstresses are kept busy and add to the cash income of their households.

The traditional role of the village priest is occupied in Vasilika by a substantial farmer, with a wife, five grown children, and several grandchildren. He not only performs his regular religious duties but is also the head of the church and the few properties owned by it. He receives a small salary from the state, and also derives income from performing baptisms, weddings, and funerals. Greek Orthodox tradition requires the priest to officate at other occasions, such as the dedication of a new home or the termination of a woman's forty days of seclusion after childbirth, and he receives small money gifts for these services. But on the tax rolls of the community the priest's occupation is listed as farmer. This is a reasonable designation because both he and his wife, natives of the village, have inherited some local lands. The priest's household, therefore, participates in the agricultural cycle common to the rest of the farmers. Although the priest now confines himself largely to supervision, if there is an unexpected need for extra labor, he tucks up his flowing robes and pitches in.

The village church organization provides for three additional salaried posts: two farmers serve as chanters and an elderly widow as sexton. Finally, the formal political organization of the village includes the position of secretary to the village council. This office is a minor civil service post which requires no qualification other than literacy, pays a small monthly stipend, and is usually held by the appointee as long as he performs his duties satisfactorily.

In all the cases just described, the supplementary activities are superimposed on the grape-wheat-cotton-tobacco farming base. The shepherds of contemporary Vasilika, however, have a significantly different round of life which there is insufficient space to discuss fully here.

/21 cont./ The one crop farming in most cases develops many economic and social difficulties. The peddlers of finished goods in the villages absorb a large part of the trade. Usually in exchange for their goods they get live poultry and eggs.

The biological function. The morals are very strict in the village. In the grammar school the children are /22/ together but after the age of 15 one seldom finds boys and girls playing together. Only the close relatives have an approved right to dance with a girl or walk with her to the market. The boys get married at from 18-25 and the girls from 15 to 20 years of age. The period from 15 to 20 is spent by the girl in preparing her dowry. She is busy at the loom or in embroidery with the needle and thread. One of the desired qualities of the girl is to have her handmade stuff. The ultimate aim of the marriage is to have children. If it happens that she cannot have a child the first year of her married life then gossip will start in the village of her inability to bear a child. Just the way a farmer thinks about a cow not calving, so do the relatives and especially the father and mother-in-law. There is no limit as to the number of the children, as long as both husband and wife are healthy. The usual belief and excuse is, "God gave them and He will take care of them." Both young men and the young women are instructed as to their duties as fathers and mothers. Birth control has no place here. Nature takes care of it. The strongest of the children survive under the conditions that are available for living. Besides, to use any method of preventing birth to a child is thought to be an immoral act. Thus out of seven to eight children in a family about five survive up to the age of six and the rest /23/ die before then.

Size of families. The size of families varies in Megali Vrisi. One finds the largest numbers among Caucasians and the smallest among Thracians. The Caucasians used to live in compound families and still they stick to this idea even though it was broken down due to the new method of distribution of land. Even today one finds as large as 25 members in the family and as low as 3 members in the family. The compound family makes farming
